

40368 Mobility and Device Fundamentals

Duración del curso: 3 Días

Acerca de este curso

This three-day MTA Training course helps you prepare for Microsoft Technology Associate Exam 98-368, and build an understanding of these topics: Device configurations, data access and management, device security, cloud services, and enterprise mobility.

Perfil de público

The Microsoft Technology Associate (MTA) is Microsoft's newest suite of technology certification exams that validate fundamental knowledge needed to begin building a career using Microsoft technologies. This program provides an appropriate entry point to a future career in technology and assumes some hands-on experience or training but does not assume on-the-job experience.

Al finalizar el curso

After completing this course, you will be able to:

- Understand device configurations
- Understand data access and management
- Understand device security
- Understand cloud services
- Understand enterprise mobility

40368 Mobility and Device Fundamentals

Course Outline

Module 1: Understanding Device Configurations Lessons

- Configuring Device Options
- Configuring Desktop Settings
- Configuring Drive Encryption
- Configuring Updates

After completing this module, you will be able to:

- Configure device options
- Configure desktop settings
- Configure drive encryption
- Configure updates

Module 2: Understanding Data Access and Management Lessons

- Understanding Cloud Storage Services
- Understanding Local Storage
- Understanding File Systems
- Understanding File and Print Sharing
- Understanding Data Encryption

After completing this modules, you will be able to:

- Understand cloud storage services
- Understand local storage
- Understand file systems
- Understand file and print sharing
- Understand data encryption

Module 3: Understand Device Security Lessons

40368 Mobility and Device Fundamentals

- Understanding the Differences Between the Internet, an Intranet, and an Extranet
- Understanding User Authentication
- Understanding Permissions
- Understanding Malware

After completing this module, you will be able to:

- Understand the differences between the Internet, an Intranet, and an Extranet
- Understand user authentication
- Understand permissions
- Understand malware

Module 4: Understanding Cloud Services Lessons

- Understanding the Types of Cloud Services
- Understanding Microsoft Intune
- Understanding Microsoft Intune Capabilities
- Understanding Microsoft Azure
- Understanding Virtual Machines
- Understanding Disaster Recovery, High Availability, Redundancy, and Fault Tolerance

After completing this module, you will be able to:

- Understand the types of cloud services
- Understand Microsoft Intune and its capabilities
- Understand Microsoft Azure
- Understand virtual machines
- Understand disaster recovery, high availability, redundancy, and fault tolerance

Module 5: Understanding Enterprise Mobility Lessons

- Understanding Identity Services
- Understanding Business Data Access

40368 Mobility and Device Fundamentals

- Understanding Bring Your Own Device (BYOD)

After completing this module, you will be able to:

- Understand Identity Services
- Understand Business Data Access

Understand Bring Your Own Device (BYOD)
